GIRLS' EMPOWERMENT PROGRAMS

GENDER ISSUES IN LATIN AMERICA

- Half of the countries with the highest rates of femicide (murder of women and girls) are in Latin America, including El Salvador which has the highest in the world.
- Up to 40 percent of women in the region have been victims of violence at some point during their lives.
- The female unemployment rate is higher than that of males (9.1 and 6.3 percent).
- Women earn between 60 and 90 percent of men's average income.
- Women only hold 23 percent of senior management positions.
- Households led by women remain poorer than those headed by men.
- Social norms still prevent working women from balancing family responsibilities and work outside the home. Even amidst signs of progress, significant gender gaps still exist in rural settings, low-income households, and some ethnic groups.

YOUTH DEVELOPMENT PROGRAMS AT OUR HOMES

All of the NPH homes have youth programs that provide opportunities for our children to develop their skills and grow. These include spiritual groups, sports teams, choirs and orchestras, theater and dance groups, and leadership development groups. Both girls and boys are engaged in all of the groups. The age range of participants varies by program and home.

In addition, NPH has joined the growing global effort to educate, support, and empower women and girls to realize their fullest potential. This not only benefits the participants, but also the social, political, and economic stability of societies worldwide. Currently four of our homes have formal girls' empowerment programs.

“CHICAS PODEROSAS” (POWERFUL GIRLS)

The NPH homes in Guatemala, Honduras, Mexico and Nicaragua have “Chicas Poderosas” programs. Activities include discussions, workshops, service projects and field trips. Through sustained participation in the programs, our young women will:

- Have greater self-esteem and confidence to be themselves and to voice their ideas and opinions.
- Make healthy and appropriate decisions regarding their relationships and life.
- Actively educate themselves about the world and pursue their dreams.
- Demand the respect, love, care, and support they deserve.
- Stand up for others who are less fortunate.
- Be creative in their solutions to personal, local, and global challenges.
- Realize their full potential as people.

BY THE NUMBERS

Country	Participants
Guatemala	56
Honduras	98*
Mexico	31
Nicaragua	15
TOTAL	200

*NPH Honduras also has approximately 50 participants in three local communities.

HIGHER EDUCATION

Providing girls with an education helps break the cycle of poverty. Educated women are:

- Less likely to marry early and against their will
- Less likely to die in childbirth
- More likely to have healthy babies
- More likely to send their children to school

After secondary school, each child has the opportunity to finish a technical course. Those who have the aptitude and desire may pursue a university degree if they give an additional year of service to help their NPH family after completing their studies. Currently 194 of the 419 NPH youths in university are female.

BY THE NUMBERS

Major	Female Students
Accounting	10
Arts & Languages	8
Business	33
Education	12
Engineering	10
Health & Medicine	24
Law & Political Science	14
Math & Science	8
